CE205

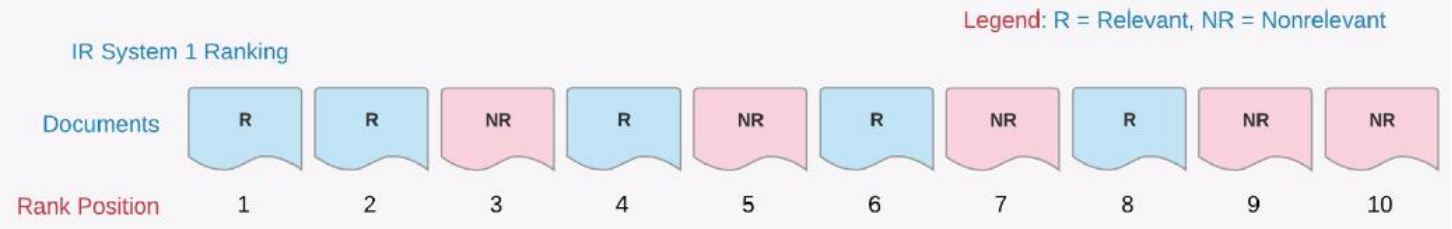

Lecture 9 Activities

Problem 1: Calculate Precision, Recall, and F1.

		TRUTH	
		Relevant	Not Relevant
What system think	Retrieved	TP = 20 (True Positive)	FP = 40 (False Positive)
	Not Relevant	FN = 60 (False Negative)	TN = 1,000,000 (True negative)

Problem 2: An IR system returns 8 relevant documents and 10 nonrelevant documents. There are a total of 20 relevant documents in the collection. What is the precision of the system on this search, and what is its recall?

Problem 3a: Calculate precision and recall at each rank position.

Problem 3b: Calculate precision and recall at each rank position.

Problem 3c: Calculate the average precision for both ranked retrieval IR systems and compare them.
